build_pok_challenge

```
graph LR; A[secp256k1_mpt_pok_sk_prove] --> C[build_pok_challenge]; B[secp256k1_mpt_pok_sk_verify] --> C;
```

The diagram illustrates a functional dependency. On the left, two white rectangular boxes are stacked vertically. The top box contains the text 'secp256k1_mpt_pok_sk_prove' and the bottom box contains 'secp256k1_mpt_pok_sk_verify'. On the right, there is a single gray rectangular box containing the text 'build_pok_challenge'. Two blue arrows originate from the right side of the two white boxes and point towards the left side of the gray box, indicating that both the 'prove' and 'verify' functions are inputs or dependencies for the 'build_pok_challenge' function.
